Hyderabad, Telangana

SUMMARY

B.Tech Data Science student building full-stack applications across web and mobile, with production experience in React, Node.js, and PostgreSQL. Currently developing an AI-powered SaaS platform (CA Connect) and a cross-platform travel app (TravelLingua).

EDUCATION

2024 – 2028	Gokaraju Rangaraju Institute of Engineering and Technology B.Tech in Data Science	CGPA: 8.90/10
2022 – 2024	Narayana Junior College, Hyderabad Higher Secondary (MPC)	96.8%

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL, HTML, CSS
Frontend	React, React Native (Expo), Responsive Web Design
Backend	Node.js, Express.js, REST APIs, FastAPI
Databases	PostgreSQL, MongoDB, MySQL
Tools	Git, GitHub, Prisma ORM, Postman, VS Code, Firebase Authentication, JWT
ML / Data Science	Scikit-learn, NumPy, Pandas, OpenCV

PROJECTS

SearchSea – Intelligent Survey Research and Analytics Platform August 2026 - Present

- Built an AI-powered research platform that automates survey analysis, from questionnaire generation and response-data preprocessing to statistical hypothesis testing.
- Applied NLP techniques to analyze open-ended responses and machine learning algorithms to identify respondent patterns and generate distinct personas through clustering.
- Developed an AI-driven insight layer that interprets statistical results and discovered patterns to generate concise, data-backed research findings.

CA Connect – SaaS powered Chartered Accountant Application July 2026 - Present

- Developing a SaaS platform using React, Node.js, Express.js, PostgreSQL, and Prisma to connect users with verified Chartered Accountants.
- Building secure role-based dashboards with authentication, appointment scheduling, profile management, document uploads, and service management.
- Integrating an AI-powered assistant for tax, GST, audit, and compliance guidance with future RAG-based document intelligence.

TravelLingua – AI-Powered Travel Language Assistant April 2026 - Present

- Building a React Native (Expo) mobile app that delivers destination-specific language phrases and cultural etiquette guidance for travelers.
- Architecting an offline-first design with local storage (AsyncStorage) so core features work without internet access while traveling.
- Designing a FastAPI-based recommendation engine to generate a personalized Travel Readiness Score based on user language proficiency and trip details.

LEADERSHIP & ACTIVITIES

Operations Lead – Google Developer Groups on Campus, GRIET Aug 2026 – Present

- Managed logistics, outreach, and volunteer coordination for developer workshops and community events.

Secretary – IEEE Computational Intelligence Society, GRIET 2026 – Present

- Coordinating chapter activities, technical events, member communications, and collaborations with faculty advisors.
